HIGH RISE HOMELESS INITIATIVE MARCH 2021 REPORT

The Center City Coalition's efforts to address quality of life and street safety issues in Center City continue to make progress. We had a very productive meeting with the Mayor's office regarding additional measures the City could take to address street safety concerns in Center City. We also have an upcoming meeting with Council President Clarke's office to discuss the creation of a mini-station on 15th street that would be permanently staffed with two police officers and one social service professional. This group would form the core of a "rapid response" team for the surrounding area to address street safety, panhandling and homelessness issues. We are also working to schedule a meeting with Krasner's office. Our hope is to be able to report next month that the mini-station has been agreed to.
